

Sign the #MyWaterPledge

By signing the #MyWaterPledge, individuals commit to increase their water knowledge, learn how to ensure all members of their community have access to drinking water and sanitation — and take action to ensure dependable, clean drinking water is delivered to everyone.

I pledge to increase my water knowledge and participate in one or more of these #MyWater actions.

➔ **Start with the water that goes into your body!**

Pledge to understand where your local drinking water comes from.
Who makes sure your drinking water is clean?

➔ **Learn about the infrastructure needed to deliver dependable, clean drinking water to your home.**

How far does the water travel to get to your faucet?
How old is the infrastructure the water is traveling through?

➔ **Learn what happens to water when it leaves your body!**

Where does it go? Who manages this water?

➔ **Learn about the weather that impacts your area, and how those conditions affect water access and safety.**

What happens when there are droughts?
What happens when you have floods?
